Rosewater Recipe:

-Organic Roses (wild roses work wonderfully)  
-Distilled water

1. Remove petals from stems and run them under water to remove any residue.
2. Add petals to a large pot and top with enough distilled water to just cover (no more or you'll dilute your rosewater).
3. Bring the water to a simmer over medium-low heat and cover.
4. Let simmer for 20-30 minutes or until petals have lost their color and are a pale pink.
5. Strain, discard petals and place water in a glass jar to store.

You can use rosewater as a natural face toner, or spray it on when you are feeling stressed. It has a very nice light scent and is soothing to the skin and nerves. God bless!
